SUMMARY

Full-Stack Software Engineer (4+ years) with strong experience in backend API development and scalable system design, specializing in Node.js and modern frontend frameworks. Proven ability in database design using MySQL/PostgreSQL, and CI/CD-driven delivery. Experienced in building and integrating RESTful APIs, and collaborating in Git-based workflows. Actively expanding hands-on knowledge of AWS and Alibaba Cloud architectures. Actively pursuing continuous learning by building AI-powered personal projects, such as an AI driven resume analyzer

TECHNICAL SKILLS

- Languages & Frameworks: C#, VB.NET, ASP.NET Core, .NET Framework, React, Angular, Next.js, JavaScript (ES6+), Typescript, Zod (Schema validation), Prisma ORM
- Databases: MSSQL (T-SQL, Query Optimization), MongoDB
- Practices: OOP, SOLID Principles, Design Patterns, CI/CD
- Tools: Azure DevOps, Git, Visual Studio, Postman, Docker

LANGUAGES

- English: Fluent
- Bahasa Melayu: Native

NIZAM YUSERI

SOFTWARE ENGINEER

WORK EXPERIENCE

Full Stack Web Developer, 08/2025 – 11/2025

Softinnovation Sdn Bhd, Cyberjaya, Selangor

- Built a React.js + ASP.NET Core application following SOLID principles, reducing feature delivery time and improving maintainability across modules.
- Cut MSSQL query time 30-40% through stored procedure optimization.
- Built dynamic Crystal Reports for accurate, efficient data reporting.

Full Stack Software Developer, 03/2025 – 07/2025

Dreamory Entertainment Group Sdn. Bhd, Puchong, Selangor

- Built a full-stack React.js application using Prisma ORM, improving data access performance and schema consistency.
- Built reusable UI components with custom react-hook-form fields increase development productivity.
- Implemented Zod-based TypeScript schemas for request and response validation, reducing runtime errors and improving API reliability and data consistency across services.

Software Engineer, 07/2024 – 02/2025

Exact Asia Development Centre Sdn Bhd, Ipoh, Perak

- Optimized Exact's VB.Net/C# web system for stability and performance.
- Refactored code using best practices for maintainable, scalable system.
- Ran automated testing and deployment with Azure DevOps for productivity.

Software Developer, 04/2022 – 05/2024

Symple Apps Sdn Bhd, Puchong, Selangor

- Built McDonald's cross-platform field force app used by nationwide field teams, supporting daily operational reporting.
- Built scalable web applications using React.js, implementing Redux.js for centralized state management.
- Built RESTful APIs for efficient app and NoSQL communication.

PERSONAL PROJECTS

Resume Analyzer – AI-Powered Application

- Improved resume parsing performance by implementing asynchronous processing, cutting analysis time by 50%.
- Enhanced file uploads UX with validation, progress indicators, and error handling in a containerized environment, reducing user errors.
- Applied modern CSS layout systems (Flexbox, Grid) to deliver responsive, mobile first user interfaces.

EDUCATION

Bachelor of Science in Information Technology, 2018 – 2022

Universiti Utara Malaysia, Sintok, Kedah

CGPA: 3.48

AWARD

Won consolation prize in ASEAN-INDIA HACKATHON, 2021

- Built online proctoring web app using Python, Django, Node.js, HTML.

Won consolation prize in Hack 4 Good 2.0 Hackathon, 2019

- Built a project to monitor the ecosystem of mangrove.
